### **RIMES SmartFiles® to Feed FinAnalytica's CognitionFoF Analytics Platform.**

New York, July 25 - FinAnalytica Inc., provider of post-modern risk management and portfolio construction analytics, and RIMES Technologies Corporation, leading financial data aggregator, today announced a partnership that will allow SmartFiles, RIMES' full-service customized data delivery solution to feed FinAnalytica's CognitionFoF analytics platform.

SmartFiles take the pain out of data processing, providing immediate access to over 200 premium financial sources and incorporating in-house information as easily as third-party datasets. All data sources become accessible via a single, direct data feed via the Cognition software suite.

Christian Fauvelais, CEO of RIMES Technologies, commented: "RIMES pioneered the delivery of financial data over the Internet. We introduced SmartFiles in response to clients' demands for something which would simplify in-house data management, leaving them to focus on their core business. Through customized file delivery, FinAnalytica will receive quality data which exactly meets the specific needs of their clients, formatted the way they want."

FinAnalytica will use the SmartFiles service to aggregate and initially deliver over 600 branded risk factor indices from leading sources including Standard & Poor's, Russell, MSCI, Merrill Lynch, Citigroup, CBOE and Hedge Fund Research.

"We are very excited about our new partnership with RIMES," said Doug Martin, CEO of FinAnalytica. "Integrating RIMES SmartFiles service into our CognitionFoF platform allows us to be responsive to customer demand for high quality, timely risk factor data. Using RIMES' best-of-breed data aggregation and delivery allows us to focus on FinAnalytica's best-of-breed risk and portfolio construction analytics."

#### **About RIMES Technologies**

RIMES, the financial data integrator, delivers the world's premier sources of data to fund managers, investment banks, custodians and corporates. In 1996 RIMES pioneered the delivery of highly-customised information and analytics via the internet; over 200 financial databases are now available. RIMES data is delivered either through powerful desktop analytical tools geared towards front-office operations, or through RIMES SmartFiles® delivering custom file services directly to the mid and back-office. Operating on the principles of quality, speed, cost-effectiveness and reliability, RIMES continues to drive change through product and service innovation.
